

## Model Building

### Test The Model

Team Leader	Harshini R
Team Members	Harini R, Dharani M and Nagavarshini S
Project Name	AI-Powered Nutrition Analyzer For Fitness Enthusiasts

### Test The Model

- ❖ Evaluation is a process during the development of the model to check whether the model is the best fit for the given problem and corresponding data.
- ❖ Load the saved model using load model.

Predicting our results

```
[ ] from tensorflow.keras.models import load_model
    from tensorflow.keras.preprocessing import image
    import numpy as np
```

- ❖ Taking an image as input and checking the results.

```
[ ] img = image.load_img("/content/drive/MyDrive/Colab Notebooks/Dataset/TEST_SET/BANANA/102_100.jpg",target_size= (64,64))#loading of the image
    img
```

- ❖ By using the model we are predicting the output for the given input image.

```
[ ] labels=['APPLES', 'BANANA', 'ORANGE', 'PINEAPPLE', 'WATERMELON']
    labels[np.argmax(pred)]

'BANANA'
```

- ❖ The predicted class index name will be printed here.
